Translate your desires into stunning designs

Thanks to our many interior styles, any setting can be created. You decide on the ambience that your future fireplace will exude. Become the master of your design – that of your fireplace, and of your whole room by extension. Our interiors are designed in such a way as to match any decor.

The start of finding your own style is having many options. Trimline Fires gives you those options. Chamber linings with many different styles and designs. Discover the options and translate your desires for your fireplace into stunning designs.

Which interior lights a fire in your heart?

Rock-patterned

Classic and stylish, with playful details. Perfect for people whose style is more casual and informal. The rock pattern will give your fireplace a sense of authentic charm.

Grooved panels

This sleek, modern, eye-catching backdrop will add interest to your fireplace and room. The grooved linings create a magical interplay between flames and design. Sleek and modern – the kind of interior that will continue to captivate, year after year.

Lamelas interior

Let the fire speak for itself. When it comes to our lamelas interior, it's all in the details. Beauty in all its simplicity. Enjoy the fire.

Glossy black glass

Glass is always special, especially when featured in a fireplace – even more so when the glass is black, and the fire starts playing against it – the glass exudes a uniquely warm, charming ambience that is both chic and elegant. On top of that, the glass reflects the fire, doubling the number of flames.

Anthracite steel

Experience double the effect! Our anthracite steel interiors have a slightly reflective quality, reinforcing the play of the fire for double the enjoyment. Zero concessions have been made in terms of either technology or design.

Vermiculite

Your fireplace should feel like a warm blanket enveloping your home. Snug, cosy and utterly comforting. If you want to embrace the beauty of mother nature and a sleek look for your fireplace, choose vermiculite.

Brick wall

Traditional brick fills your fireplace with romantic ambience, exuding authenticity. The different shades of brown in the brick add a playful, cheeky note. Stunning!
